PROFILE SUMMARY

Results-driven, competent, and dynamic software engineering student offering hands-on experience in contributing to innovative, groundbreaking software solutions that meet business demand for agility, flexibility, mobility, user friendly and a superb cloud experience with a track record of excellent ratings on performance reviews. High-performance technologist skilled at distributed systems programming, debugging, defining, testing, coding, designing, providing post-deployment support and implementing a highly secure, continuous-deployment pipeline to update applications in cloud environments. Quality developer bringing a strong focus on the “voice of the customer” into the software development function to ensure product and customer success.

WORK EXPERIENCE

DevFellow
Founder

(September 2020 - Present)

DevFellow is a web design team. As a first project, we created a highly successful non-profit shipping platform named Chamedoon for a customer with more than 1000 users within the first month of launch. We formulate a successful business plan with a strong emphasis on growth and community needs. We oversee successful website launches and continuing operations.

Paramount Commerce
Software Developer

(September 2019 - December 2019)

Successfully migrated direct debit payment system from NET to Java and developed REST API endpoints with the SQL database. I ensured code meets the functional intent of the requirements and seamlessly integrates with all components of the system within 4 months of internship.

EDUCATION

McGill University
Bachelor's Degree Software Engineering

(September 2018 - Present)
3.8

Dawson College
Diploma Of Collegial Studies Pure And Applied Science (FirstChoice)

(September 2016 - May 2018)

PROJECTS

Personal Portfolio
<https://github.com/Narimanzk/PersonalPortfolio>

A personal portfolio website which is built using HTML, CSS and JS

Bloommerce
<https://bloommerce.com/>

A multi-language business directory that is built for a customer using WordPress

DevFellow
<https://devfellow.com/>

A website for my web design company that is built using WordPress

Pet Adoption Application
<https://github.com/Narimanzk/PetAdoptionApp>

A web application that is built using Spring, PostgreSQL and BootStrap

Machine Learning
<https://github.com/Narimanzk/AppliedMachineLearning>

Using COVID-19 data to analyze search trends during the pandemic.

SKILLS

Spring	Django
Flask	Node
Express	NPM
ReactJS	AngularJS
Vue	BootStrap
HTML5	MongoDB
PostgreSQL	MySQL
Netlify	Heroku
Travis CI	Circle CI
Docker	Git
Agile	Jira

AWARDS

Certificate of Distinction for Weekly Math Challenge Winner
Dawson College

Certificate of Distinction for Research project on Irregular Second Order Linear Homogeneous Differential Equations
Dawson College

CERTIFICATIONS

Java Programming Masterclass for Software Developers
Udemy

Python Bootcamp From Zero to Hero
Udemy

LANGUAGES

English Fluent	Farsi Native
